Dear Science Teachers and Administrators.

Are you looking for a way to incorporate Problem –Based and Inquiry Learning into your science classes? Consider making independent research part of your school's science curriculum by having your students compete in the Central Sound Regional Science & Engineering Fair (CSRSEF) on March 12, 2012!

The CSRSEF is Washington State's newest regional science fair serving high school students in King and Snohomish Counties. The CSRSEF allows students to design and conduct independent research on the topic of their choice while meeting many of the 9th-12th grade EALRs as outlined in the Washington State K-12 Science Learning Standards.

Check out the CSRSEF website at <http://scidiv.bellevuecollege.edu/sami/scifair> to learn about upcoming professional development opportunities for teachers and to download the 2012 teacher's guide, CSRSEF rules, and worksheets.

We look forward to seeing you and your students in March!

Sincerely,
Kate Souza, *Central Sound Regional Science & Engineering Fair Director*
