

Clay Animation Network

Summer 2012 classes

Welcome to the Clay Animation Network, a local traveling animation school. Students who take classes through C.A.N. work in small teams to produce unique animations while using the iPAD2 as their production tool. For Lego® and clay animation they use the iPAD2 camera to take photos and for hand-drawn animation a program called Doink. All storyboarding is done on the Sketchbook Pro app. For post production each group uses iMovie for final voice-overs, sound effects, and video editing, and Garage Band to create an original soundtrack. Animation classes seamlessly integrate visual art and theater with basic math, science, and language arts. The end product is a unique movie that students can then look up online at www.cancancancan.com. Visit the site to see class commercials and over 1,000 student works!

Radio Control Car Racing

Customize and race OFF-ROAD radio controlled cars while progressing through different skill levels. Play driving games that use magnets for capturing other cars and props, police car chases, obstacle courses, and much more.

LEGO ANIMATION: Robots

Create custom machines for various purposes using a variety of hinges, swivels, and levers. Bring them to life using stop-motion animation on the iPAD2.

iPAD 2 ANIMATION: BugTopia

If you strapped a tiny video camera to an ant or a fly, what worlds would open up before your eyes? Students will animate using the iPad2 app called "Doink". Entomology lessons included!

CLAY ANIMATION: Morph

Explore the endless combinations of shape shifting between characters and objects using the same process of animation that is used in movies such as "Wallace and Gromit" and "Pirates: Band of Misfits".

iPAD 2 ANIMATION: WATER - (12:15 - 3)

If you went deep sea diving in a submarine would you find Atlantis, volcanoes with hidden alien colonies, mermaids, or something else? Students will animate using the iPad2 app called "Doink". Oceanography lessons included!

LEGO® Animation: Impossible Worlds

What if people could change color as they walked up walls, or if cars drove people or if someone could do 50 flips in the air and land on their feet? Push the limits of reality through animating imaginative worlds using the iPAD2.

iPAD 2 ANIMATION: AIR

Animate characters flying through the air with wings, propellers, jet packs, magic, etc. Explore basics on the history of flight while using the iPad2 app "Doink".

Classes are held in Seattle, Bellevue, Woodinville, Kirkland, Shoreline, Lynwood, and more! SCHOOLS include Woodinville Montessori, Bertschi, Eastside Prep, Eton School, Evergreen Shoreline, Evergreen Bothell, Stroum Jewish Community Center, Soundview, Villa Academy, Bellevue Children's School, Meridian School and more!

Check out the website below to view over 1,000 student-made movies and to watch the commercials for the summer class offerings.
