| Course Number | Date | Title | Course Fee/ Late Fee |
|---------------|---------|--|-------------------------|
| TM9242 | 6/25 | Creating with iPads NEW! Many educators have found the ease of using the iPad makes it an amazing tool for students to create new content—from documents and presentations to videos, photos, and even artwork. Learn about creating these and more, including screen recordings, animations, and podcasts, as ways to extend and show learning on the iPad. Course fee includes lunch and a \$20 iTunes gift card to purchase apps in class. | \$115/\$140 |
| TM9241 | 6/26-28 | Digital Photography Daycamp - BYOCC (Bring Your Own Camera & Computer!) Learn to get the most out of your digital camera at this workshop! Sessions will include hands-on computer lab time and extensive practice taking photographs. Day 2 will include a field trip to practice your new skills. Topics covered: get to know your camera's settings and special functions; explore concepts unique to digital photography including resolution and file size; discover the rules of photo composition; download, enhance, retouch, crop, and export your images; and most of all, have fun! We hope you can join us for three days of digital photography immersion this summer! Prerequisites Familiarity with computers and BRINGING YOUR OWN CAMERA and LAPTOP COMPUTER are required. | \$295/\$345 |
| TM9240 | 7/10-12 | HDSLR Video and Production Premium NEW! Educators are faced with the transition from tape based video cameras to tapeless. Flip video type cameras are great for the history teacher but CTE teachers need to give their students experience working with industry standard tools. Digital SLR or DSLR cameras are the current camera of choice for most independent video producers. In this workshop participants will get a hands-on experience using the cameras, lenses, accessories and then working with the files using Adobe Premiere Pro. This workshop utilizes both hands-on instruction and self-guided modules that include templates, handouts, examples and step-by-step video tutorials. This approach individualizes instruction and allows users to move at their own pace and maximizes the instructor interaction with the participants because they can focus on their own instructional needs. These materials are all copyright free and can be used by the participants in their own classrooms. Audience: Video teachers, and anyone interested in using a DSLR camera to shoot video. LOCATION: Mount Si High School | \$290/\$340 |
| TM9243 | 7/13 | SMART Board/SMART Notebook 101 NEW! Learn about the SMART Board hardware and associated software & tools. The morning includes instruction, practice, and tips related to set-up, configurations, and basic functions on the SMART Board. In the afternoon explore online resources and using SMART Notebook software for developing instructional content. | \$95/\$120 |

| | | | |
|--------|--|---|-------------|
| TM9249 | 7/19 | Adobe Summer Camp NEW! Adobe Summer Camp is an opportunity for Adobe-using educators and enthusiasts to participate in a day-long program focused on all things Adobe! Three- and six-hour workshops will be taught by local Adobe education superstars, who will share their Adobe software and teaching expertise. Participants will be given the chance to become part of a new, regional Adobe user community. | \$85/\$100 |
| TM9228 | 8/1 | Looking Up the Future-The Changing World of Teacher-Librarians NEW! Changes in budgets, education policy and technology have brought great uncertainty to the world of teacher-librarians. How are districts and teacher-librarians responding to these challenges? What coming trends can we be preparing for? What specific strategies are working? How can schools participate in group purchasing opportunities to reduce expenses? Listen to experts and colleagues share their strategies, experiences and visions for addressing the changing roles of libraries and teacher-librarians. Discounted fee of \$50/person for teams of 3 or more! | \$65/\$80 |
| TM9244 | 8/7-9 | Lego Robotics NEW! Expand your knowledge of robotics and learn how to integrate robot design and programming projects into your K-12 classroom. During this 3-day workshop, participants will investigate the power of the LEGO MINDSTORMS NXT to deliver fun and engaging projects that make Science, Technology, Engineering and Math come alive. Teachers will learn how to program robots using variables, logic blocks, control loops, sensors, and data logging – all within an easy point-and-click programming tool. The workshop will include group design projects, discussions of best practices, and methods of relating lessons to real-world applications. Teachers will walk away prepared to use hands-on robotics activities in their schools or districts to enhance student creativity, logic, and problem-solving skills. | \$290/\$340 |
| TM9247 | 8/14 plus 10/13 and 1/12/2013 | Publish Your Students' Work! NEW! "Publish Your Students' Work!" is comprised of three days of training, which will be conducted over the course of a six-month period. This course is Part 1 of a two-part program. Participants who sign up for Part 1 will be automatically enrolled in Part 2 at no additional charge. This workshop will cover the differences and similarities among print books, ebooks, and websites. Participants will explore various self-publishing tools and options that give students and teachers an easy way to professionally prepare and present their work. Participants will further explore lesson plans, writing strategies and Web 2.0 tools for writing, designing, student collaboration and publishing. Motivate students to want to write! | \$225/\$250 |
| TM9248 | 8/15 | iPads in Education Symposium The iPad has stormed into education, seeing widespread application less than two years after its introduction. Many educators have seen great potential in their initial implementations, and new strategies for their use seem to emerge every day. This mini-conference will feature presentations looking at classroom and administrative uses of iPads, technical sessions for IT staff, and even a review of alternatives to the iPad. There will be something here for everyone, whether you are already using iPads or just exploring the possibilities! | \$75/\$90 |
| TM9266 | 7/26 8:30-12:30 | iPads for Educators: iPad 3 Included JUST ADDED! Course fee includes a 16GB iPad 3 | \$685 |
| TM9267 | 7/26 1:00-4:00 | iPads for Educators: iPad 3 Included JUST ADDED! Course fee includes a 16GB iPad 3 | \$685 |
