

Standout Schools

Live webcast series
June 19–July 31

Learn as educators share how Apple one to one implementations help them achieve amazing results.

Educators are using technology to engage students in exciting new ways, connecting them with curriculum like never before. To help highlight these successes, we're bringing together education professionals from across the country to share their inspiring stories through a series of special webcasts.

This is your opportunity to learn from and speak with your peers as they describe best practices in their implementations from a leadership, IT, and curriculum perspective. Registration is now open, so make plans to join us for these insightful webcasts.
