Schools with science labs are **required** to implement chemical hygiene plans under CFR 1910.1450 and WAC 296-828

Have you completed yours?

Initial Training Topics:	Advanced Training Topics:
Regulatory requirements for the plan	Site-specific plan components
Conducting the chemical inventory	Chemical-specific protection
Minimizing chemical exposures	Medical exams and consultations
Roles and responsibilities	Completing the written plan
Facility issues and procedural issues	Conducting the required trainings
Chemicals of concern	Hands-on spill response practice
Hazardous waste disposal options	Chemical safety inspection practice

These workshops provide you with the information you need to complete your school's chemical hygiene plans and meet the requirements for mandatory trainings under WISHA. Clock hours are available upon advanced request.

Please RSVP to dave.waddell@kingcounty.gov to attend, get directions and receive other important workshop materials and information.
