# Robotics Extravaganza

Are you up for  
an adventure ???

Join us along the shores of a blue polymer lake, where nearby you'll find lava bombs, pirate ships, and a mischievous monkey robot (with rather long arms)... Space adventures, battle bots, a juggling robot, and a journey through the shire with a Hobbit... Big robots, small robots – and ALL robots with attitude!

Who dreams up these things? Middle schoolers – that's who! And they're amazing!!!!

Come to the Robotics Extravaganza where you'll see a crazy display of robotics worlds. Make mini-robots, puppet robots, movies, microscopes, and more! It's science, robotics, and learning like you've never seen it before!

Fun for all ages, and FREE !!!!!

Catholic Schools Robotics Extravaganza  
Saturday, May 3  
9am-11am  
Seattle Prep gym  
Free

(DANGER: Robots with attitude tend to throw things...proceed with caution...)
