

Puget Sound ESD Teacher Librarian Summit

Creating a Library for the Next Generation of Learners

As more and more students turn to digital tools and media to get their information, the library is becoming less of a place where students only go to check out books and access resources. The traditional library needs a 21st Century make-over!

Please join us for an action-packed day of learning and sharing. During this summit educators will come together to learn about the many ways teacher-librarians are redefining their libraries into a learning space where students come to collaborate, produce, present, and contribute to one another's learning.

Date: July 31, 2014
