

## Seattle Prep Math Games 2014

Seattle Prep's first ever Math Games was a wildly fun event, and students had a great time despite the dastardly math challenges tossed their way. With 150 students from 20 different schools, they nearly blew the roof off the gym with their amazing math energy!

There were popcorn perplexors and relay race graphs, rubies and feathers and pizza box nets...evil eyeballs, demented scientists, and kids working math all over the place!!! It was math like you've never seen it played before!!!

We were proud to have so many daring participants, and noted a few schools that had outdone themselves for the day:

Most Spirited – for bringing joy and energy and phenomenal fun to the day!

- **St. Bernadette**
- **(St. Louise rocked the room as well!)**

Most Creative Approach – for approaching the challenges with amazing outside of the box thinking and daring to try unique approaches!

- **St. Anthony Team 1**
- **(also noted were St. Mark Team 1, St. Louise Team 4, ASB Team 1, and St. Anthony Team 2 !!)**

Best Teamwork – for working together to measure, compute, laugh, and challenge one another to excel!

- **St. Vincent de Paul**

Challenge Totals (in no particular order) – for working the challenges with exceptional care in computation and approach, and for tackling even the most difficult problems!

- **St. Louise Team 4**
- **St. Joseph Team 2**
- **St. Luke Team 1**

**And St. Anne's won a \$100 certificate to Math 'n Stuff for its math department! Lucky mathematicians!!!**

If you can't tell by now, it was a crazy great time. Check out the photo gallery below. You'll find fun and fancy and lots of great math. And, if you missed it, stay tuned. We're readying the playing field for next year's math adventure...!
