This session will review some of the most important and dramatic successes of Catholic schools, with a view to understanding what teachers have done to contribute to this remarkable and consistent success. The session concludes with concrete suggestions for assisting teachers to persevere in maintaining these high levels of achievement and engagement.

In this age of accountability, teacher evaluation is a concern shared in public, private, and Catholic schools. Assuming that the definition of good teaching is related to student learning, this session explores the characteristics of effective classroom teachers and describes in detail what effective classrooms look like. Veteran educators will find great affirmation here; novice educators will hear great advice, all based on recent research. We conclude with a call for a deepening teacher spirituality, rooted in the sacramental life of the Church.
