Presented by **ANITA ARCHER, PH.D**

As educators strive to maximize students' academic growth, one of the best tools available is explicit instruction that is a structured, systematic, and effective methodology for teaching academic skills. Explicit instruction exemplifies the idea that how well students learn depends on how well they're taught.

This workshop will immerse practitioners in the theory and practice of designing and delivering instruction in a manner that is systematic, direct, engaging, and success oriented. Explicit instruction is for use in all instructional settings and with all types of skills, including Common Core.
