# Robotics Extravaganza

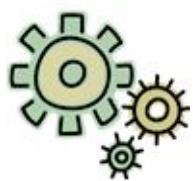

## Robots, contraptions, and gizmos galore!!!

Where can you go to find motion and madness, robots, science, and crazy contraptions? The Robotics Extravaganza, of course! Get your most dastardly minds planning and create a world or two. In this year's Extravaganza, just about anything goes!

New this year: more challenges to melt your minds (remember lava bomb bowling?) and prizes for creative uses of science-y things (think polymers, paper circuits, and strange things that move). Plus, another fabulous Lego EV3 robot set free to some lucky school – will it be yours?

It's going to be a morning of wild science, robots, and things that only middle schoolers could dream up! Amazingly fun!

Catholic Schools Robotics Extravaganza  
"Chain Reaction"  
Saturday, May 2<sup>nd</sup>, 9am-11am  
Seattle Prep Gym
