

# Engineering Is Elementary

For Teachers in grades 1-5

March 20, 2015 9:00AM-3:00PM

St. Matthew School, Seattle

Engineering is Elementary curriculum integrates engineering with the science topics you already teach. Fun, engaging engineering challenges that boost student interest in engineering.

This is a great marketing tool for your school! Teachers can do these projects as often as once/month or 2 times/year.

See [eie.org](http://eie.org) for more information.

Many projects are free from this online resource. Participants will also receive a curriculum packet at this training session.

Presenter is Mr. Paul Burke. He is the middle school science teacher at St. Matthew and went to a teacher training workshop fall 2014 to train teachers in this program.

All are welcome. Please email [kherlihy@stmattschool.org](mailto:kherlihy@stmattschool.org) to RSVP number of teachers and grades who wish to attend. There will be a lunch break from 12-1:00. Clock hours will be available.

Location: St. Matthew School Community Center

1230 NE 127<sup>th</sup> St., Seattle, WA 98125
