Robotics Extravaganza

Brace yourself, Sir Isaac – the robots are coming!!!

It's time!!! It's time!!! for motion and madness, robots, science, and crazy contraptions! The Robotics Extravaganza is here again! Our theme this year????

Newton's Laws!

This year's Extravaganza will dazzle and delight, with robots running wild, science made real, and creativity like you've never seen before. Sir Isaac would never have imagined such craziness!

So get those creative minds working to build a world in 3-d motion. Prizes for ingenious interpretations and surprising uses of science-y things (think polymers, paper circuits, and strange things that move). Plus, another fabulous Lego EV3 robot set free to some lucky school – will it be yours?

Catholic Schools Robotics Extravaganza
"Newton's Laws!"
Saturday, May 7th, 9am-11am
Seattle Prep Gym
